Get what you need to succeed: Innovative ideas and fresh new approaches to supervisory success

So much is expected of supervisors today as they step forward and take on the challenges of leadership

We don't have to tell you how demanding, fraught with uncertainty and just plain hard your job can be. Every day you wake up to a myriad of management responsibilities to carry out, issues to keep up on and problems to take care of. Of course, you're expected to be able to do it all flawlessly ... from managing change to finding new solutions to stubborn problems to supervising a workplace of diverse employees and more.

That's a tall order for any supervisor because today's work world is changing at warp speed. In the blink of an eye, the solutions you relied on yesterday can become outdated and useless.

Here's the bottom line:

To succeed in your expanding role, you've got to get in tune with the times ... and keep one step ahead of the changes.

That means continually updating your skills and seeking out all the freshest ideas, latest strategies and cutting-edge techniques you can get your hands on.

That's where this intensive, hands-on workshop comes in. In just two days, you'll get the most up-to-the-minute information and exciting discoveries available on how to manage change, motivate, discipline, delegate, inspire, problem solve ... all the critical skills you need to succeed as a supervisor.

Become a more effective, more successful supervisor—in just two days ...

Have you ever felt like you're stuck in a supervisory rut? That there's no free time to seek new ways of approaching your duties? Do you wish you knew how other supervisors handle the same puzzling problems you face? Then this energetic workshop's for you.

It provides a rare opportunity to step back ... polish your skills ... and renew your energy and commitment to supervisory excellence. If you want to zero in on the key areas of improvement needed to boost performance, productivity and the bottom line, this is the place.

In just two days, you'll gain skills that will give you a tremendous edge in your job now and throughout your professional future, like how to:

- Communicate like a leader
- Handle sensitive employee situations with diplomacy
- Inspire people to try harder—and succeed
- Stop negativity from spreading
- Deal with know-it-alls, foot-draggers ... every problem employee
- Make better decisions about time management to get more done

If you're new to the job, this upbeat workshop will break you in fast. If you're experienced, it will help you polish your skills to get even better.

Every supervisor will walk away with an arsenal of up-to-the-minute information, bold strategies and proven-to-work approaches. You'll feel motivated, energized and prepared to tackle any tough situation that comes your way.

Don't miss this opportunity to spend two full days focused on *your job* and *your unique problems* ... each day packed with ways to guarantee your success in your ever-expanding role as supervisor and leader.

This workshop's for you if you need the latest information out there on how to ...

- Project the image of a strong, confident and capable role model to employees
- Think and perform like a leader and enjoy the amazing results that follow
- Adapt your leadership style so you can better coach, discipline and motivate your people to succeed
- Accomplish more of the things you want each day without burning the midnight oil
- Act promptly and appropriately to correct problem personalities who can make life miserable
- Demonstrate in a positive way to employees how change can work for—not against—them
- Keep your team on track, heading toward the same goal and achieving the objectives important to your company
- Gain a fresh perspective on motivating your employees so they're virtually unstoppable
- Get credit for all your good work by learning how to position yourself and your accomplishments

Do you need this course?

- Has your career reached the point where knowledge of the latest strategies is critical to your success?
- Do you rely on traditional ways of handling problems because you haven't had the opportunity to learn new approaches?
